PROFESSIONAL SUMMARY

Analyst with an applied mathematics background and hands-on experience turning large industrial datasets into business intelligence within the construction equipment after-sales supply chain. Builds automated data pipelines in Python, delivers management reporting across a 240,000+ SKU catalogue, and translates commercial requirements into forecasting, inventory and customer segmentation models. Acts as the bridge between business stakeholders and technical teams, with a focus on data-driven decision-making in supply chain and logistics operations.

WORK EXPERIENCE

Spare Parts Analyst — Saracakis Group of Companies, Athens

Nov 2025 – Present

- Automate catalogue processing, XML data generation and Excel reporting with Python (pandas, openpyxl), replacing manual workflows with scalable, repeatable data pipelines across a 240,000+ SKU dataset.
- Deliver VP-level management reports for the Volvo CE and Komatsu brands, translating OLAP cube sales data into structured dashboards covering YTD turnover, gross profit and GPM% versus budget and prior year.
- Perform data validation and transformation on large pricing files prior to ERP upload (Microsoft Dynamics 365), ensuring data integrity and consistency across domestic and export flows.
- Build and maintain customer segmentation models from 12-month sales baselines (KEY / CORE / LONG-TAIL / SPORADIC / INACTIVE tiers), supporting data-driven commercial and inventory decisions.
- Gather business requirements from senior management and translate them into analytical models, rolling forecasts (F3+9 logic) and reporting tools used directly in commercial planning.

Client Experience Associate — InTouchCX, Athens

Jul 2025 – Nov 2025

- Supported a leading FinTech client in the Canadian market; documented interactions in CRM systems and analysed customer insight data to drive process improvements.

Customer Service Representative — TP Greece, Athens

Sep 2023 – May 2025

- Managed high-volume customer interactions for the UK and Greek markets, consistently exceeding KPIs for resolution and satisfaction.
- Recorded structured case data in Salesforce and Zendesk; collaborated on cross-functional process improvement initiatives.

Administrative Secretary — Athens Army Material Control Unit

Oct 2022 – May 2023

- Maintained inventory and asset records for a large Army division; coordinated inspections and supplier deliveries, supporting materials control and logistics operations.

Bridge Tournament Director & Club Manager — Greek Bridge Union

Jun 2019 – Present

- Organise national and regional tournaments; manage club budget and membership. Silver Medal — Europe U25 Bridge Tournament.

EDUCATION

B.Sc. Applied Mathematics & Physical Sciences — National Technical University of Athens (NTUA)

In progress — completed part-time alongside full-time employment.

SKILLS

Programming & Query Languages: Python (pandas, openpyxl), SQL, Java (basic)

Data & Analytics: Excel 365 (advanced), Power Query, IBM Cognos Analytics, Google Looker Studio, OLAP cube data; currently developing Power BI and Tableau

Supply Chain & Business Analysis: Demand forecasting (F3+9 rolling logic), inventory analysis, customer segmentation, pricing data management, KPI reporting, S&OP support, requirements gathering, stakeholder communication

ERP & CRM Systems: Microsoft Dynamics 365, Salesforce, Zendesk

Languages: Greek (native), English (full professional proficiency — ECPE)

CERTIFICATIONS

- Generative AI Data Analyst — Vanderbilt University (Coursera), September 2025
- Google AI Essentials (Prompting) — Google
- English Language Proficiency — ECPE, University of Michigan (C2 level)

– Certified Bridge Tournament Director — Greek Bridge Federation

PROJECTS

- GPM & Sales Performance Tracker — internal tool built in Power Query / Excel for tracking gross profit margin and sales performance against budget across brands.
- Apple TV+ Data Exploration — Python and generative AI analysis of viewership data, with insights presented in an interactive dashboard (GitHub repository in progress).
